Summary

This is just a simple key rack which mounts using 3M Command Strips

[Household](#) > [Office](#)

Tags: [keychain](#) [key](#) [rack](#)

I needed a simple wall mounted key holder so I designed this simple key rack which uses 3M Command Strips (the large size similar to [these](#). It is designed to be printed without supports and should sit flat to the build plate.

I designed this keyholder using my magnetic refrigerator key holder and photo frame, as a starting point. You can find that design [here](#).

The STEP file is included for easy remixing.

If you find this models useful, please post a like or a comment with some pics of your prints. You can find the other things I'm working on at my blog [here](#). You can also follow me here on Printables to see what new stuff I post. Thanks for looking!

This remix is based on

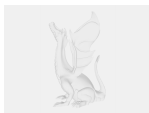

Magnetic Key Holder with 4x6 Photo frame (for 5 keys)
