230420 Solar panel drain clip Trina Vertex S 30mm

Now I have solar on my roofs I found the drain clip and adapted it to Trina Solar Vertex S 30mm and also optimized the printability by making a 12 pack print file which fits on a Prusa MK3 bed.

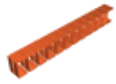

The original was printed in PLA but from my earlier experience in hot environments I do not think this will work, so PETG is has become Printed in PETG, infill 25% and 0,3mm draft mode.
