Summary

Stopper shield/spacer with holders for newer Thetford RV fridges

[Hobby & Makers](#) > [Automotive](#)

Tags: [camper](#) [rv](#)

Newer Thetford RV fridge shelves are not built from round but T-shaped spokes. Goods on the top shelf can slide to its back and block the self-dry drain, leaving the food all wet.

So I designed a shield and holders to build a stopper. The stoppers are fixed to the spokes via a quarter turn.

A shorter shield may be installed parallel to the spokes, making a nice divider.
