### Summary

I remixed the great JBL Go belt clip <https://www.thingiverse.com/thing:2632569> to fit the woovebox groovebox.

[Gadgets](#) > [Audio](#)

Tags: [jbl](#) [woovebox](#)

Right after printing, the fit seems a bit rough, but after some sliding in and out it works pretty good. Printing in Petg on a Prusa MK3s+ with 0.2 resolution, no supports and 15% infill was great, ymmv with other hardware/ settings.

### This remix is based on

**JBL GO Belt Clip**
