Summary

A cool keychain

[Hobby & Makers](#) > [Organizers](#)

Tags: [keychain](#) [key](#)

A cool Keychain that you can personalize and scale as you want

In the photo you can see one printed at 100% (at the bottom), one at 150% with my name (in the middle) and one at 200% (at the top).
For reference the squares on the PEI sheet are 10mm x 10mm

You can add text in the slicer with the “Join” operation or the “Cut” one

Printed in PLA+ at 0.2 on a 0.4 nozzle, but i would recommend using PETG or TPU if you plan to carry it around :)
