Summary

This is a MagSafe iPhone charging rack to be secured with adhesive.

[phoneholder](#) [magsafe](#)

This should fit any sized iPhone, given that I modeled it with my iPhone 14 Pro Max in mind, which is the biggest iPhone produced.

I secured the holder to the underside of my desk using 3 x 5 (cm) double-sided adhesive tape from 3M. For this project, I DID NOT use an Apple-branded Magsafe charger. Instead, I used a much cheaper one from Amazon: https://www.amazon.com/dp/B0C2BQ8NQC?ref=ppx_yo2ov_dt_b_product_details&th=1

I do not think this charger is the same size as the Apple MagSafe charger, and I do not have exact dimensions or the ability to test tolerances with an Apple charger. I have provided the Solidworks file in case anyone wishes to modify the design to account for a properly sized charger or to make any other changes they may like such as adjusting how low the phone sits below your desk.
