This one is made for extending the Skadis wall a little bit.

Base idea:

- hide the hooks
- easy printable, no supports needed

If you want to extend the "range" - there are three obj-files named "basecorpus".

You can import them in your CAD and build your own tray or whatever around them.

If you like this - give it a like.

When you modify the basecorpus or remix it in any way - please share it.

If something wont work, please let me know - gonna try to fix it then.

Have fun!

## Print Settings

### Printer:

We call him Gutenberg

### Rafts:

No

### Supports:

No

### Resolution:

0.2mm

### Infill:

yes ;)

### Filament:

Any brand PLA/PETG/ASA....

rainbow

### Notes:

I printed in ASA, so for longer/bigger parts I used an brim

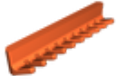

Category: Organization
