Summary

We really like the light of these stars - but as you can mention if winter time is over, time to replace the stars...

We really like the light of these stars - but as you can mention if winter time is over, time to replace the stars with something else.

So we made this simple Lampshade, fitting as an replacement for the A1 star (using the LED).

Just remove the star, attach this lampshade and summertime can come over :)

We glued the three parts together - its self explaining...

Enjoy it :)

Print Settings

Rafts:

Doesn't Matter

Supports:

No

Resolution:

0,15mm layer hight

Filament:

any one you have I used PETG

transparent, white

Notes:

Lampshade and diffuser part has to be printed in spiral vase mode to make it nice and shiny.

The lampshade is recommended with transparent filament, the diffuser I used white filament (but feel free to select the color of your choice)
