I like to keep a metric ruler on my desk under my computer screen to reference to when doing design & 3D print related things.

I got tired of trying to pick my ruler up off the flat desk as its so thin/flat, as well as having to move above it to view it.

This is a simple 46 min print with no supports. I did this at 20mm Quality, with 10% Infill and used the beautiful Prusament Galaxy Black PLA.
