Summary

You can use this as a base to make your own Bird Buddy holder, it takes care of the proper screw holes for you.

Use this as a base to make your own Bird Buddy holder by importing the STEP file into your 3D modeling software and starting from there, or if you use Shapr3D you can also use the SHAPR file. This includes a minimal mount with the proper hole sizes and distances, so you can screw it into your Bird Buddy using the screws it comes with.

You can of course also print this as is and use it with double-sided tape or some glue to glue it on somewhere.

If you like what I'm doing, please give it a like consider [joining my club](#) or buying me a coffee! ☺
