Summary

A secure cover for 7-day pill organizers, preventing accidental spills on the go. Keeps medication in place.

While being able to easily open the compartments of a weekly pill box at home is nice, it becomes problematic when taking it on the go and all of the pills spill out and you're left with a mess when opening your bag. This cover solves this issue by tightly holding a 7-day pill organizer, preventing the compartments from opening. Also has a hole at the bottom to make it easier to take out the pill box if you can't firmly grasp it by the edge.

Fits any pill box with a maximum size of 19.05 mm x 32.55 mm x 113 mm (0.75" x 1.28" x 4.45"). It was made to fit a 7-day pill box I bought from the container store a few years ago, which has the days of the week in letters and Braille as well on each compartment door, but it seems to not be sold anymore.

Prints nicely in PLA in the default model orientation without supports at a layer height of 0.20 mm. Depending on how well your bed sticks, I would recommend adding a brim.
