### Summary

A fun light cover to upgrade basic wall mounted light fittings.

[lightcover](#)

This is a simple light cover that fits over standard fittings designed for DIY covers and lamp shades. It was specifically designed for the wall-mounted lights on the outside of my house, but you could use it in other ways.

Easy to 3D print without support material, I used PETG for these to be suitable for outdoor use. Printed on a Prusa MK3S+.
