Summary

Replacement shade for classic globe style wall sconce

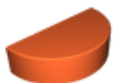

[Household](#) > [Home Decor](#)

This is a replacement shade for the original glass globe shade on a widespread wall sconce model. The shape is a half-cylinder because the original globe shape would not have printed well without supports. For the same reason, the shade needs to be printed in two parts and bonded with CA glue. If your light fixture is equipped with a filament or halogen bulb, I recommend printing the shade out of ABS or ASA for heat resistance.
