Tags: [starwars](#) [jedi](#) [jediorder](#) [galacticempire](#)

Tokens with a diameter of 50 mm and a height of 2 mm. With the emblems of the Jedi Order and the Galactic Empire. They can be used both independently and for insertion into my [Onigiri box](#) or [Big Key Tag](#). They are printed on a single extruder, by changing the color of the filament at a certain height.

The height of the layer is 0.2. At what height to change the color - see the attached screenshots.
