### Summary

Support LCD portable for model UYY 16.1" and other (see description), is literally simple :)

[Gadgets](#) > [Portable Devices](#)

Tags: [portable](#) [lcdholder](#) [notebookaccessories](#) [uyy](#)

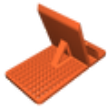

I thought I needed a different support than its original (protective case with support function on the worktop), a support less bulky and free of possible falls at the slightest movement more or less abrupt on the work table.

I therefore decided to design a support to keep the portable screen on the work table at a 70° angle alongside my notebook.

I want to clarify that this support has been designed based on the size of the 16.1" UYY screen, probably can also be adapted to other screens that have a maximum depth of 10.3 mm.

I hope it's useful, for me it is :D
