Summary

Replacement mounts for legs and body for a Hobby Lobby Sewing Mannequin

[Hobby & Makers](#) > [Other Ideas](#)

My son and his friend decided to fit this sewing mannequin with a chain-male shirt that was quite heavy. The result was they broke mount for the legs and cracked the mount for the body. These are the replacement parts that I made to get the mannequin standing again.

This is a super easy print that does not require any support. I did print this was ABS, 4 walls and 40% infill for strength.

After printing the body mount piece, I inserted a nut into the slot for locking screw.
