Summary

Remix of the front and rear base of the spool winder to fit in a 180mm printer table

Tags: [filament](#) [filamentspoolholder](#) [filamentspoolwinder](#) [spoolwinder](#)

My printer has a 180 mm table and I was not able to fit the front and rear base so I have remixed them in order to fit. All the model dimensions are the same as the original except from the lower frame that has been cropped and the holes that have been moved closer.

Update 16 Oct 23 : I have created a reinforced version of the two bases with extra braces to make the sides more stable. In addition to the stability the braces will also act as bridges while printing.

This remix is based on

Filament Spool Winder
