updated 8. 10. 2023 | published 8. 10. 2023

Summary

Frame for the Simon 54 brand of switches and outlets. Should fit all lineup. Only tested with light switches.

[Household](#) > [Other House Equipment](#)

Tags: [lightswitch](#) [lightswitchcover](#) [outletcover](#) [receptacle](#)

Includes an optional 1 wall shroud which ensures the frame fits tightly to the wall.

Shroud is meant to go into the slot on the underside of the frame. The tolerances on my printer are pretty tight and so is this print. But any Prusa or Bambu should print these with ease.

It should be easy to make 2x, 4x etc versions - but so far I didn't have a need for that - LMK if you'd be interested.

This frame should be easy to remix, or take measurements from to make duplicates.
