Tags: [fan](#) [waveshare](#) [poe](#) [cm4io](#)

Case for the waveshare CM4 IO board, supporting the use of a 1U style server fan for cooling. Comes with two lids (with and without text).

I printed this on a Creality Ender 3 S1 Pro using Sunlu Meta PLA. Note the tolerances are tight enough that you should have properly calibrated your printer for dimensional accuracy to ensure a first time print success.
