Print these Halloween themed Elements from the Periodic Table!

Use these files to print and display Spooky with Elements of the Periodic Table!

Each model contains the element symbol, atomic mass, atomic number and a small hole for hanging.

Perform a filament change at the correct layer height in order to get two colors as shown in the photos. *If using Prusa Slicer it should automatically detect that you are using text and ask if you want to apply the color change.

Subscribe to our club and gain access to our exclusive model: [The Periodic Table of Elements](#) with all 118 elements! Use them to come up with your own words or phrases!

Hope you enjoy!
