Summary

A remix of Clee's Beefy Z idlers

[3D Printers](#) > [Voron Parts & Upgrades](#)

Title pretty much says it. Nothing wrong with the original design I just didn't like the monster aesthetic. I also prefer to use pins and heatsets wherever possible.

BOM

8x M5 Heatsets

8x M5x50mm BHCS

4x M5x18mm pins

8x M5x30mm BHCS (from original idlers)

4x Pulleys (from original idlers)

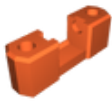

My pictures show the body of the idlers upside down because I didn't have the right length of screws. The heatset should be on top so that it won't be ripped out over time by belt tension.
