Summary

Turtle keychain with moving legs and head!

Simple but cute turtle keychain with moving legs and head!

Prints in place with 0.3 mm clearances, so it should be doable on most printers. I had success printing them in PLA, but any material that doesn't string too much should work well.

I recommend printing with 0.1 mm layer height because of the fine joints. The infill doesn't really matter as long as you have 2-3 outer walls for strength in the joints. No supports needed in the default orientation!

Enjoy!
