updated 11. 5. 2022 | published 21. 3. 2021

### Summary

These simple dovetail mounts allow you to place the LCD unit from a Prusa i3 MK3S(+) outside an Ikea LACK enclosure.

These simple dovetail mounts allow you to place the LCD and SD card reader from a Prusa i3 MK3(S/S+) outside an Ikea LACK enclosure, or any other (heated) chamber. You will need some longer cables (I ordered two 80cm 10 pin LCD cables from AliExpress) to make this work. I've had no issues with the longer length cables (80cm), so I would not worry about that.

I would suggest printing some shorter LCD legs first (you can find them online), as the display will otherwise stick out a lot.

I've included a drill template in the .STL file that can be used to accurately (pre-)drill (or center punch) your holes.

### Support

If you'd like to support me for the 3D models I distribute for free, you can use the following AliExpress affiliate link: [https://s.click.aliexpress.com/e/\\_AoUC8h](https://s.click.aliexpress.com/e/_AoUC8h)

Whenever you buy something through this link, I get a small kickback without costs for you :)
