Simple box to contain a DC-DC step-up converter (xl6009) with an USB-C input and an output for a PC fan.

Printed on Artillery Hornet in PLA with 15-20% infill. I used organic support just for the pc fan connector hole

It's my first model, I know there are some imperfections, but it does what it's supposed to. If anyone wants to make changes, they are free to do so.
