### Summary

A monitor mount for a 15.6" Portable Monitor on a Qube 500 Case

[Gadgets](#) > [Computers](#)

I figured with a portable monitor that you can attach to the PC case then you can take your PC wherever you go. As long as the Monitor gets its power from the PC then the only cord you need to worry about is the PC power cord. It also leaves some room on the Qube 500 Case so you can print a holder for a mouse, keyboard, or even a controller.
