### Summary

Organiser for Isle of Trains: All Aboard to store the components securely and make setup faster.

This is a box insert for **Isle of Trains: All Aboard** designed to keep all the components organised in the box and make setup faster.

I remixed [majino's insert](#) to modify it in a few ways:

- The victory point tokens are now stored in their own separate tray which is larger, so there's a section for each denomination and the tray can be taken out of the box during play rather than putting the tokens on the table
- Added a divider to the bag tray so the track pieces have a specific place to be stored
- Increased the size of the finger hole around the train token so it's easier to take out of the box
- Rounded off corners on the trays

This insert will fit the kickstarter promos (the extra engine card, the three additional ticket tiles, and the wooden meeples). It definitely won't fit sleeved cards.

Print one of each file.
