Summary

A 16mm adapter for SJB4127's Dehydrator Filament Dryer walls.

Tags: [dryer](#) [dehydrator](#) [filamentdryer](#) [rosewill](#)

I printed [Inobrevi's remix](#) of [SJB4127's Dehydrator Filament Dryer walls](#). I measured my Rosewill trays and mistakenly thought Inobrevi's remix would fit. Measure once, and all that; 22 print hours later, ironically I find I need another $\lt s \gt 22\text{mm} \lt /s \gt$ **16mm** to fit my particular dehydrator trays firmly. That's ok, I can make a print for that! And subsequently a second one, once I figure out the first one was too big. One print to rule them all. And lo, THIS is that print! [evil cackles]

0.2mm LH, 3 walls, 15% Cubic, ABS.

Update:

Turns out, I needed 16mm, not 22. Measure once, print thrice. I removed the 22mm adapter. I'm gonna go sit in the corner and ponder my mistakes, now.

This remix is based on

Dehydrator Filament Dryer (Up to 5 x 1kg Spools!)
