updated 8. 10. 2023 | published 8. 10. 2023

### Summary

Remix of the Meaker Mk26 nerf blaster! Threading for the "Ex" BCAR design, and a battery cap for using larger batteries!

Just a couple of simple mods for the wonderful Mk26 flywheel blaster designed by Meaker!

The Barrel remix enables the use of the "Ex" Bearing SCAR designed by Epicxxx. I have found this to greatly increase accuracy with the right version of BCAR! My Mk26 hits about 180 fps by default, and a 13.1mm BCAR at 6 degrees of twist was perfect to add accuracy and tune it down to 150 fps for my local games.

The Battery Cap remix allows the use of larger batteries, such as the Out of Darts 3s Graphene battery.
