### Summary

A center/vanity cap for a Moen bathtub faucet.

[Household](#) > [Bathroom](#)

Tags: moen

Moen bathtub faucet handle's center cap was missing when we moved in.

The white part of the center cap was printed in PETG with .1 mm layer height. It press fits into the faucet handle. The colored inserts for hot/cold were printed in PLA @ .1mm and press fit into the white center cap (added some ca glue for good measure).
