Summary

Another minimal Playdate stand that angles it backward quite a bit.

I keep my **Playdate** on my desk and wanted it to sit back at an angle for optimal screen legibility with my lighting situation.

So this may be weirdly specific, but here it is in case you're in the same boat!

Printed with three perimeters and a whopping 50% infill just because, shown here in Prusament Orange PETG for some kind of muppet color scheme.
