This model dates back three years, but I felt it was time to share it now. Back then, I was reorganizing my room and looking for extra storage space. That's when I noticed all the unused space behind the TV 😊. So, I designed this Vesa 200 compatible shelf to cleverly hide items behind the TV. It served its purpose perfectly until I moved out to my own apartment.

I'm sharing this in hopes it might help someone else in a similar situation
