### Summary

Upgraded replacement handles for kids playset

[Sports & Outdoor](#) > [Outdoor Sports](#)

Tags: [handle](#) [playset](#)

The nearly 20 year old handles on the playset at my parents' house had crumbled from years in the sun. I designed these in Tinkercad. The old handles used carriage bolts but I switched these to use regular bolts so we could use a socket and wrench to tighten them.

Printed in Overture PETG with 80% infill (I think) on Ender 3 V2. Support needed under handle part.
