Zombie head!! Decaying and stinking, Rotting and dead, cant be anything other than a horrific zombie head!

Done on my bambu. If you have an AMS drag these files into your slicer of choice and color them as needed. If your doing single color prints, youll have to glue them together I assume? or you can do filament swaps and print as one piece but yah I dunno how that'll work out for ya?

resize as you see fit to do so. try to keep thickness at 1mm so its a fast print! 0% infill, 5 top and bottom layers, and then hit GO!

Post your makes! Thanks!
