### Summary

This is a rework of a model to work well as a nametag keychain

[Art & Design](#) > [2D Plates & Logos](#)

Tags: [star](#) [trek](#) [startrek](#) [keychain](#) [nametag](#)

I updated one of my other uploads to double as a nametag for two of my cats (Spock and Kirk)!

A collection of 4 Star Trek insignia keychains, this includes the commander, medic, engineer, and researcher. If you want any others or any changes let me know and I can make them!

The original models are much much bigger than needed, to get a size I liked:

- Scale the X and Y down to 30%
- Scale Z to 100% (for color swap)
- 0.08mm layer height
- 100% infill
- monotonic layer pattern
- Ironing on the topmost surface

The multicolor is done with a layer swap,

1. Start with black
2. Swap to white on layer 12
