Summary

These are credits from the clone wars era of star wars.

I printed these with gray overture silk PLA, and then just colored the credits with metallic sharpies. I designed this item on Tinkercad using web images as reference. However, I recommend printing this with black filament and spray painting it. I will be making other Star wars money items in the future. You also might want to scale this down to 75 or 50 percent size, because these are a bit big. Enjoy!
