Summary

Simple mount to attach to items for 6x2mm magnets. I used for multiple cosplay items. No low profile option available.

[Costumes & Accessories](#) > [Cosplay & Costumes in general](#)

Simple mount to attach to items for 6x2mm magnets. I used for multiple cosplay items. No low profile option available. I used to marry split parts from STLs that needed to be cut to fit. All options i could find were to large to use in items pressed against the body/skin.

It is a tight fit may need to mess with scaling slightly.
