Summary

Stand for the juice o'clock sirup containers

[Household](#) > [Kitchen](#)

Tags: [stand](#) [juicebox](#) [juiceoclock](#)

Juice O'clock has a really good product. They are creating syrup with many flavors. Easy to carry, and easy to add to water (sparkling or not) and you can enjoy a really good taste. With ot without sugar. I prefer without. to be honest.

But with the tap at the bottom you need to place it at the front of your desk/shelf.

For the start you can place them on a wrapping carton, but that will not work very long. So I designed a stand where this fits perfectly and a standard glass fits underneath.

There are three platforms. One without any logo, one with logo inset and one with multiple objects to print in multiple colors.

The stand is also avaiable in three versions: standalone, side and middle. If you want to connect them you can use the holes at the outside.

To connect you can use magnets 6mmx3mm or my dovels. The round ones for the top and side to have them close to eachother. You can use the edged ones, to have a bit of spare room between the standees to replace easy the carton.

If you don't have ordered them now, start here: [juice o'clock](#) (we both will get rewarded, you may can call this affiliate link)
