Introducing the “Key Twirler”!

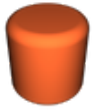

Ever had a door in your house that stubbornly insists on keeping its key in place, like a loyal guard dog? Well, our “Key Twirler” is here to tame that beast! It’s like giving your key a comfy armchair, making it as easy to turn as a doorknob.

This is a godsend for those tiny tots who struggle to unlock the gateway to their garden adventures. With the “Key Twirler”, they’ll be twisting that key with the ease of a seasoned locksmith!

I’ve also thrown in a Fusion 360 F3D file for good measure. If it looks like it was built by a blindfolded kangaroo, that’s because I’m still cutting my teeth on this!

So, say goodbye to stubborn keys and hello to smooth turns with the “Key Twirler”!
