Summary

Very basic cube to test you 3D printer out for the first time. Great print if you want to see how precise your printer is

If you have a new 3D printer or want to test the accuracy of your printer, definitely print this cube as it won't take long and uses very little filament, measure it up after to see your results

I have the dimensions of it set to 20x20x20mm but you can change the scale in your slicer
