### Summary

A super simple, customizable key tag. SCAD file included.

Most key chain / name tag designs seem to have the text as elevated features. I've designed this one to have the text at even height.

So whether you print this with a color change after ~1.4mm or hand-paint the letters: they will be a bit more protected against abrasion or being torn off by a thick margin of plastic around them.

Furthermore, customization is easy and low-effort with OpenSCAD.
