Tech-Tag is a 3D printable key tag that lets you personalize your keys with your name and three icons that represent your passion for technology and computing. The name is written in a font similar to the Transformers movie, giving it a cool and futuristic look. The icons are a teacher, a gear, and a CPU, symbolizing your role as an educator, a maker, and a computer enthusiast.

You can print the tag in any color you like, but we recommend doing a color swap before the icons to make them stand out.

Tech-Tag is easy to customize with any name using an Slicer or CAD software. Just add the text, slice the model, and print it on your 3D printer. Tech-Tag is the perfect accessory for tech-savvy teachers and students who want to show off their skills and style.

I hope you like this name and description for your 3D printable model. If you need any further assistance, please let me know. 😊

ALL Frikarte3D designs are protected by the Copyright Law. By downloading, YOU HAVE NO RIGHT to sell any digital files or print models of my designs without my explicit written consent.

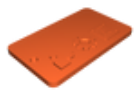

To sell them legally, message me so we can work out a deal.

Hope you like it! Any advice, or recommendation is welcome! Happy Printing!

I would be very grateful if you print it and put it on social networks to tag me at [@Frikarte3D](#)

If you tag me and have a private account or I don't follow you, please send me a message so I can see your post and appreciate your work.
