I purchased a Stanley Fat Max 4-1 mobile work station fifteen years ago to house all my specialty tools in. I've used it nearly everyday and I love it. A friend of mine purchased the Craftsman branded version from Lowe's for fifty percent off because it was missing one slider and another was broken. I printed him a couple PETG copy's of the slider and they work flawlessly. He uses his to carry all his Milwaukee power tools in, and it is heavy. The sliders take a decent amount of stress when the box is so heavy. The two printed sliders have been in service for four months now and are functioning perfectly. I printed them with four perimeters which make

makes them a solid object. Unfortunately supports are necessary, I set the top support contact z distance gap at .25 and the support easily pops right out. This rolling work station is sold by Stanley, Craftsman, and Dewalt and is available at Lowe's, and Home Depot.
