### Summary

When your little farmer's pedal tractor broke its hook, we 3D printed it to keep their farming adventures alive.

No mission is too big for our love for our budding little farmers! When our cherished nephew's pedal tractor broke its hook, we couldn't allow his farming spirit to fade away. And so, we got to work to 3D print a new hook!

The project was an extraordinary success! Seeing the joy in our nephew's eyes when he saw his "resurrected" tractor was priceless. His radiant smile warmed the hearts of the entire family.

This small project taught us that love and commitment can truly make a difference. And now, our little hero's pedal tractor is back in action, ready for new farming adventures.

We are happy to have found a creative and loving solution to fix his favorite toy and want to share this story of love and compassion. So, if you have a little budding farmer in need of some love in the form of a new hook, remember that 3D printing can work wonders! Children's happiness is our greatest reward, and it's what makes every effort worthwhile.

Notes:

- To be printed with supports;
- I left the scad file, hastily written, in case anyone needs it to customize
