Summary

Here are the tags and labels for remixing.

[Hobby & Makers](#) > [Other Ideas](#)

Tags: [tag](#) [label](#)

Instructions

This is part of this project, [Keychain and Tags](#) so you can change these documents to suit your needs.

Print instructions

In the case of Tags, it is necessary to indicate in the slicer in which area you want to pause to insert the magnet.

- [Bambu Studio and Orca](#)
- [Prusa Slicer](#)

This is already prepared on the 3mf files available for download, but you can do it on your own.

- 1x neodymium magnets of 10x3mm ([Amazon associate link](#))

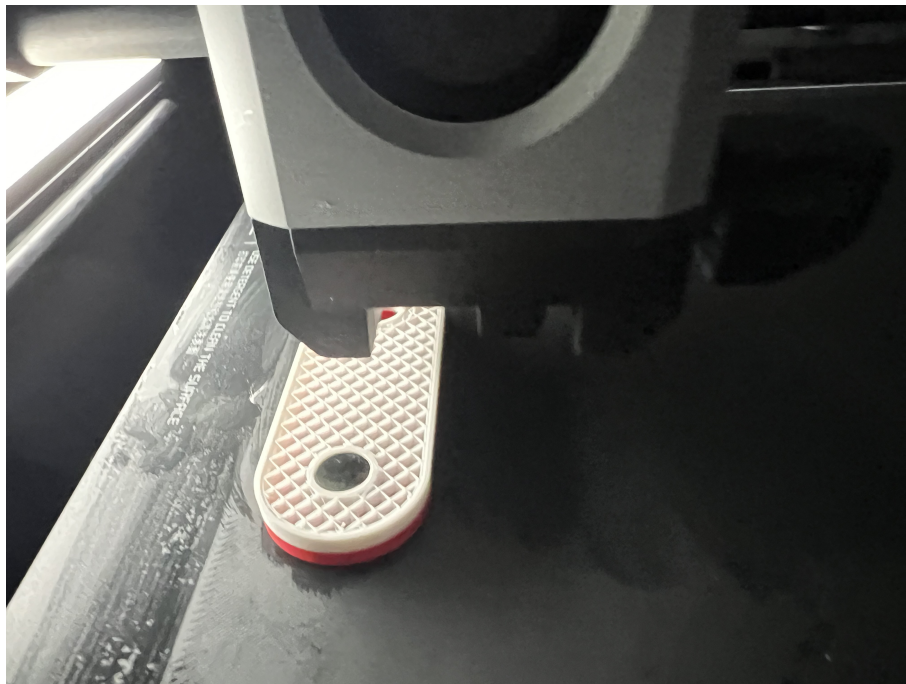

1. After a couple of minutes, the printer will pause, it's time to insert the magnet. It will not top on the socket but, should be easy to insert it.

Do not hard press the build plate!

1. CHECK THE MAGNET POSITION 2 TIMES TO BE SURE, it should attract in this position:

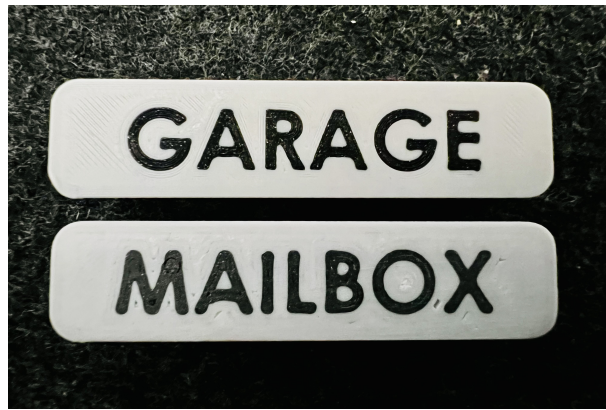

1. Be sure that the magnet is nicely flushed, if it is above the print layer, do not continue.

1. Resume printing.

This image, show the difference between a 0.2 and a 0.4mm nozzle:

Support the designer:

- For a small help, use this affiliate link to buy filament, it will cost you the same. Thanks ! [Filaments used on this project](#)
- This design is free for the benefit of the community, but If you like my designs and want to contribute, you can make a donation to [buymeacoffee](#) or [paypal](#), or even better, join “My Club” here in [printables.com](#), that will be greatly appreciated.

[And check my other projects, maybe you find there something useful](#)

Model files

3mf Files form Bambu Studio or OrcaSlicer

2 files

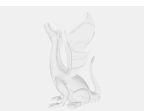

tags_and_label_04mm-nozzle.3mf

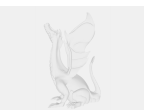

tags_and_label_02mm-nozzle.3mf

☐ If you have a 0,2mm nozzle, use this. Much better resolution
