### Summary

Key tags sculpted to resemble weathered old boards or logs. Pairs perfect with a western-style font and wood-fill PLA.

Tags: [keychains](#) [rustic](#)

These key tags were created in Blender and sculpted to resemble rough-cut old boards. Prints best at a higher resolution to ensure the grooves are smooth and consistent. Text is raised above the plate to make printing the text in a second color and easy filament swap. Looks great when using a darker wood-fiber PLA.
