3D-printable stand, specially designed for up to three electric toothbrushes.

Not only does this stand guarantee stability with its robust design, but it also features drainage channels that allow any residual water to escape and evaporate, ensuring your toothbrushes stay dry and hygienic. Moreover, with ample spacing between each toothbrush slot, you won't have to worry about them magnetically attracting each other.

In my case it is used for the Oral-B Pulsonic Slim Clean 2000.

Printed with:

- Bavaria Filaments PLA Silver
- @210°C
- 0.2mm layer height
- 0.4mm nozzle
- on Prusa Mk4
