UPDATE: Added extension STL in case you want to increase the height of the camera.

UPDATE 2: Added new v2 version which has a cutout for mag build plate which has a handle in front and it was hitting the original version. Plus it has hooks for the extrusion end plate to make it more stable.

Webcam holder for Ender 3 Pro which mounts to the Y axis belt tensioner on the 40x40 extrusion, it has a cutout for the pulley, with minimal length just to clear the bed. The extrusion width could be made thinner to work with 40x20 extrusion on a standard Ender 3.

It is made mainly for the Logitech C920 webcam with a foldable mount, which rests nicely on top of the holder.

Might work with other webcams with foldable mount or you can use any webcam and simply put it on a double-sided tape.

If you like this, please consider giving it a like and posting your make.

Print Settings

Printer Brand: Creality

Printer: Ender 3 Pro

Rafts: No

Supports: Yes
