Summary

Had to make one before someone else did...lol

[Toys & Games](#) > [Action Figures & Statues](#)

When I found out about the awesome Dummy 13 designed by soozafone, I had to print one or two and then I realised they NEEDED a Lightsaber. Used the staff from the original to make it.

This is at 200% so you'll need to scale down for the original size. I printed my Dummy 13 at 200%.

There is a Full Saber file which is the purple one in the photo and then I made a hilt and blade separate so people can print the blade in Vase Mode and glue together which is how the blue one was printed.

I just changed colour at set layer heights. Make sure you use a brim.

This remix is based on

DUMMY 13 Printable Jointed Figure (BETA FILES)
