Simple hex design laptop stand, made from 4 parts, 2 “legs” and 2 bars. Bars are designed for a loose fit, can be scaled up if you would like an interference fit for a more permanent arrangement. Loose fit allows for easy breakdown when not in use. Bars are only there to aid stability when laptop is removed from the stand as once the laptop is in position the stand is self-stabilising (when tested on a 19mm thick laptop). Design is specifically for an “upright” laptop arrangement for when it is being utilised as an additional screen for a desktop setup.

Large base design aids balance, preventing “tipping” when laptop is open. **Designed for 17" laptop**, could be used for larger models **but stability has not been tested above 17"**.

Suits any size of laptop **so long as the bottom edge is 19.5mm or thinner**.

Please check size before printing. **Catch opening measures 19.75mm**.
