Tags: [hanger](#) [magnetic](#) [neodymium](#) [thermometerholder](#)

Magnetic hanger that works with pretty much anything. I use it to hang a thermometer!

Print it with alot of infill to make it sturdy.

This is what you gonna need:

- 2 neodymium magnets. Size: 8mm x 3mm.
- 1 machince screw M4 at 14mm length (use shorter or longer if you want).
- 1 nut M4.

No need for glue. Print it and push the magnets and the nut in place.

Done!

The neodymium magnets are very strong and can hold a lot of weight!

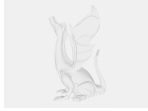

Size of the magnetic holder is approx: 44mm x 16mm x 4.5 mm.
